## Preface

Statistics provides a platform for the county government to have policies and programmes informed by evidence. The County Government of Makueni is working collaboratively with the Kenya National Bureau of Statistics (KNBS) to strengthen the county statistics function. This gives impetus for the county government to strengthen administrative data production and reporting mechanisms. It is against this background that the County Government of Makueni has prioritized annual production of County Statistical Abstract.

The County Statistical Abstract 2022 makes invaluable contribution to our development objective to improve the lives of the people of Makueni County through an integrated, multifaceted, impactful, and sustainable development process that prioritizes people, promotes inclusivity and participation, upholds accountability, and fosters strategic partnerships. Accurate, timely and reliable statistics remain key to measuring progress as well as tracking the effectiveness of policies, programmes and interventions.

The Makueni County Statistical Abstract is being launched after the celebration of the African Statistics Day 2022 whose theme was *“Strengthening data systems by modernizing the production and use of agricultural statistics: informing policies with a view of improving resilience in agriculture, nutrition and food security in Africa.”* This is timely and aligns with the aspirations of the citizens of Makueni as documented in development strategies to address agricultural production, productivity, marketing and market access for the products from the county.

I am happy that the County Government is also launching the inaugural Ward Statistical Profiles. These profiles are a single source of ward information highlighting key and disaggregated data at the ward level. The disaggregated data brings to the fore a dimension of understanding of the data that may not be deduced when presented in aggregates. The Ward is the basic planning and implementation unit in our county and thus the demand for disaggregated data. This data provides valuable programmatic evidence to policy makers and informs preparation of ward plans and resource allocation.

Looking into the future, my government is committed to strengthening the statistics function to ensure policy relevance and strong linkage of the administrative data to policies, plans and budgets. Our resolve remains unwavering to strengthen systems for data production and use at the decentralized levels. We have initiated the preparation of a County Citizen Generated Data Strategy as well as five-year County Statistics Plan. These will be aligned to the National Statistics System, the County Statistics Policy, 2021 and our development philosophy *“Wauri wa Kwika Nesa na Ulungalu”*.

**H.E. Mutula Kilonzo Junior, CBS**

Governor Makueni County

## Foreword

The first principle in the United Nation's Fundamental Principle of Official Statistics states that official statistics provide an indispensable element in the information system of a democratic society, serving the government, the economy, and the public with data about the economic, demographic, social and environmental situation. To this end, official statistics that meet the test of practical utility are to be compiled and made available on an impartial basis by official statistical agencies to honour citizens' entitlement to public information. It is within this internationally accepted norm embedded in the Statistics Act, 2006, that the 2022 Makueni County Statistical Abstract (CSA) was produced.

In line with its mandate of collaborating with and assisting the county governments or any other institutions in the production of official statistics in the country, the Kenya National Bureau of Statistics (KNBS) collaborated with County Government of Makueni to produce the 2022 CSA. The 2022 Makueni CSA is a single source of information that presents the official statistics produced by Ministries, Departments and Agencies (MDAs) both at National Government and the County Government of Makueni. This publication provides data series on various sectors of the economy at the county level for the period 2017 to 2021. The data is mostly from administrative records and sample surveys conducted within the period.

The production of the 2022 Makueni CSA has gone through all the recommended stages of producing official statistics. The statistics generated were validated by the MDAs within Makueni County both from National and the County Government. The data were reviewed by the technical team from KNBS and County Government of Makueni.

The 2022 Makueni CSA is categorized into an introductory chapter and five other chapters based on the classification of statistical activities undertaken by national and international statistical organizations. This classification follows the statistical subject-matter domains with five domains of: Demographic and Social Statistics; Economic Statistics; Environment; Governance Statistics; and Cross-cutting Statistics.

We welcome the readers to this publication and encourage contributions aimed at improving the contents and quality of future publications. KNBS appreciates the collaboration that has resulted in the production of this publication which contains a comprehensive set of indicators that are useful for planning and policy formulation for Makueni County.

**Macdonald G. Obudho, MBS**

Director General

Kenya National Bureau of Statistics

## Acknowledgement

The preparation of Makueni County Statistical Abstract, 2022 (CSA 2022) was made successful through a collaborative effort between the county government departments, national government departments and agencies. This collaboration has improved timely compilation the data and thus the 2022 series of the CSA is improved with 27 new tables. This clearly demonstrates the progress made to strengthen the county statistics function.

I wish to express my sincere gratitude to H.E. Mutula Kilonzo Junior, CBS the Governor of Makueni County and H.E Lucy Mulili, the Deputy Governor for providing their support during the entire process in the production of this publication. I also want to thank the County Executive Committee Members, County Chief Officers, Directors and all staff who participated in the process of production of this abstract.

My sincere gratitude goes to Kenya National Bureau of Statistics for providing technical support which has culminated in the preparation of this County Statistical Abstract. Special thanks go to the County Commissioner for playing a pivotal role in coordinating the data collection process. I appreciate the contribution of departmental heads that provided timely data and also participated in the validation of information contained in this publication.

Special thanks to the CSA technical team led by Eliud Ngela and Benjamin Avusevwa and comprising of John Bore, Boniface Mutua, Stanlus Matheka, Jeremiah Mutunga, Sarah Omache, Geoffrey Kariuki, Ephantus Kuria, Katra Dahir, Cynthia Musangi and Veronica Ndeto. I acknowledge the contribution of the research interns; Anthony Mwongela, Joseph Musyoki Luke, Boniface Mwongela, Tracey Kilonzo, Ritter Kiswii, Cornelius Kivuva, Peter Kaluah, Joseph Kaviku and Nancy Mbithe for their tireless efforts in the successful compilation of data and production of this Statistical Abstract. Finally, I wish to reiterate the department's commitment in strengthening linkages with various stakeholders to improve the quality of the future Statistical Abstracts.

## Introduction

### Overview of Makueni County

Makueni County is one of the 47 counties in Kenya. It is situated in South Eastern part of the Country. It borders Machakos to the North, Kitui to the East, Kajiado to the West and Taita Taveta to the South. The county is located between Latitude 1° 47' 21.483" South and Longitude 37° 37' 16.7502" East. It covers an area of 8,176.7 KM<sup>2</sup>

Makueni County is predominantly inhabited by the Akamba community who form approximately 97% of the total number of the inhabitants. There is a substantive percentage of people from other communities especially in the major towns. It has an average population density of 110 persons / KM<sup>2</sup> with Mbooni Sub –County recording the highest population of 199 persons / KM<sup>2</sup> and Kibwezi Sub County recording the lowest of 62 persons/ KM<sup>2</sup>.

The main economic activities in the County are subsistence agriculture, beekeeping, small-scale trade, dairy farming and limited coffee growing, eco-tourism and commercial businesses. The fertile upper part of the county, which experiences a higher average rainfall of 800mm-1200mm, has both natural and planted forest and is suitable for dairy farming. The lower side on the other hand, receives rainfall ranging from 300mm to 400mm and hardly sustains the major food farming. This means livestock rearing remain the common viable economic activity being undertaken by the local people in the lower region.

Tsavo National Park which lies in the southern part of the County, in Kibwezi East is considered as one of the worlds biodiversity strongholds. It is home to diverse wildlife species which include the famous big five consisting of lion, black rhino, elephant and leopard. The park also has a great variety of bird life such as the black kite, Crowned crane, love birds and the Sacred Ibis among others. This makes it a significant tourism destination for local and international tourists.

## 2.2 Business Statistics

This sub domain covers economy-wide statistics on the activities of businesses across different sectors (as opposed to 2.3-2.9 that deal with specific individual sectors). It covers topics like statistics on economic activities of businesses, business demography, business investment, business services, demand for services, industrial performance, enterprises by size class, industrial production, commodities, structure of sales and services, outputs of the service industries, non-profit institutions and labour statistics collected from businesses.

### 3.0 Environmental Statistics

The breakdown in this domain follows the structure of the Framework for the Development of Environment Statistics approved by the United Nations Statistical Commission in 2013. More detailed breakdown of statistical areas can be found in the FDES

#### 3.1 Environment

The sub domain covers statistics about the physical, biological and chemical characteristics of the environment. The FDES further breaks it down to three subcomponents: (1) physical conditions of the atmosphere, hydrographical information, geological and topographic information, and soil characteristics; (2) land cover, ecosystems and biodiversity, protected areas and species; and (3) quality of air, water and soil.

## 4.0 Governance Statistics

The breakdown in this domain follows the structure of the Handbook of Governance Statistics approved by the UN Statistical Commission in 2020. More detailed breakdown on statistical areas can be found in the HGS.

### 4.1 Participation

This domain covers statistics on the ways in which individuals take part in political and public affairs, including by registering to vote, voting or standing as a candidate in elections; being members of legislative, executive and judicial bodies; accessing positions in the public service; being a member of a trade union; and engaging, individually or as members of political parties and other non-governmental organizations, in political activities.

**Table 4.1.1: Registered Voters by Constituency and Ward in 2013, 2017 and 2022**

Wards	2013	2017	2022

## 4.2. Access to and Quality of Justice

This sub domain covers statistics on the ability of people to defend and enforce their rights and obtain just resolution of justiciable problems, through impartial formal or informal institutions of justice and with appropriate legal support. It covers both criminal and civil justice, including the accessibility, effectiveness and quality of legal assistance, processes, decisions and outcomes.

**Table 4.2.1: Cases Filed, Pending and Resolved by Various Courts, 2017 – 2021**

## 5.0 Cross-Cutting Statistics

This domain deals with conceptual or data work based on thematic approaches that require bringing together data across different domains to meet the data needs for policy agendas for development. The domain also covers statistical work that spans two or more of the previous subject-matter domains, or is not elsewhere classified.

### 5.1 Information Society and Digitalization

The sub domain covers work on statistics, indicators and frameworks to monitor digital transformation and the use and impact of information and communication technologies (ICT) on society. It looks at these topics in a wider sense than economic aspects, including well-being in a digital society, work on internet use, internet application, information and communications technology trade, computer use, broadband connectivity, e-commerce, etc.

**Table 5.1.1: Number of Beneficiaries of ICT Capacity Building Programmes, 2017-2021**
