1. Municipal Investment Plan FY2024/25

The investment plan serves the municipality to identify for impactful projects with projected resources. It helps in both planning and prioritizing projects for each financial year with reference to integrated development plan and other plans. The manager highlighted the key investment projects to be undertaken in the FY2024/25 having consideration of Urban Development Grant (UDG) funding eligibility menu. The manager informed the public some of investment that the KUSP II donor funds can do.

The UDG menu of eligible investment/expenditure areas are classified into five categories;

- Waste management (Liquid and solid)
- Storm water drainage
- Connectivity (roads, non-motorized transport facilities, street and security lights)
- Urban Socio-Economic infrastructure

ELIGIBLE URBAN FUNCTIONAL INVESTMENT AREAS

Fire and Disaster management

2. Municipal Solid waste Management policy

Constitution of Kenya (2010), provides for the right to a clean and safe environment. The Wote municipal charter (2018), has highlighted collection of solid waste as one of core mandates for the municipality in ensuring healthy and clean environment for urban residents. The environmental officer presented a draft on key areas of the proposed municipal solid waste management policy that aims to create a regulatory environment that will ensure Wote Municipality promotes sustainable waste management as an income-generating venture. She presented the situational analysis.

sis on how the municipal has been managing the its solid waste starting from; generation, collection, transporting and dumping.

She also pointed the milestones and improvements that has been made to make our urban areas or markets clean and conducive for business activities. Since the policy was on draft stage, the members of the public were informed to be part of the process and encouraged to share their ideas, views and suggestions as they wait to give their final input during the policy public participation in quarter two. The promised to fully support the policy once it's on implementation stage. The citizen fora serve as one of mechanisms for sensitizing the community on policies affecting them.

3. Municipal Grievances Redress Mechanism (GRM)

The Municipal manager informed the participants on the proposed grievances redress mechanism (GRM) which will be used to solve disputes reported to municipality offices. The system involves timely receipt and processing of complainants recorded from individuals or groups negatively affected by the activities of a particular project or even the general issues.

Wote Municipality will use this guideline to provide a framework/ procedure for resolution of grievances emanating from project beneficiaries, project implementers and other stakeholders during implementation of its projects and programs. This will ensure smooth implementation of the projects, timely and effectively addressing the social conflicts that would be encountered during implementation.

The manager the public to give their views on the proposed guidelines and also informed them on their right to write petitions on matters pertaining development of the municipality. It was noted that the GRM was one of the key performance standards for KUSP II funding.

4. Conclusion

The Citizen fora ensured participation of the residents in decision making in activities and in projects/ programs that can be implemented by the Municipality. In order to ensure success in our municipality there is a need for the residents to be proactive stakeholders in participate fully in all affairs.
